

Barnabas House

This is a project in Gravesham, Kent in an association with Green Pastures to end homelessness.

Barnabas House accommodates and supports the vulnerable and less privileged in our community that are threatened by a crisis.

It offers a safe environment where people can start to recover from the chaos and stress of homelessness.

Here, we provide ongoing pastoral care and a key working system which give service users access to comprehensive support including general counselling and advice on housing and welfare benefits, job training, gaining life skills, budgeting & managing bills, and other assistance they may need to get their lives back.

We have a team of experienced support workers who are always ready to help. Please get in touch with us today to see how we can help you or people you work with.
